

Amazon Prime Video Analysis Dashboard

Name: Tejaswini Panda

Project: Data Visualization

Tool: Power BI

Date: May2026

Project Overview

This project analyzes the Amazon Prime Video dataset (titles.csv) by using Power Bi.

The objective of this dashboard is to explore trends in movies and TV shows, analyze content distribution, and generate insights based on ratings, genres and release years.

Dashboard Objective

The objective of this dashboard is to provide a clear and interactive visualization of Amazon Prime Video content.

It helps analyze the distribution of movies and TV shows, identify popular genres, understand rating trends and examine release patterns over time for better insights.

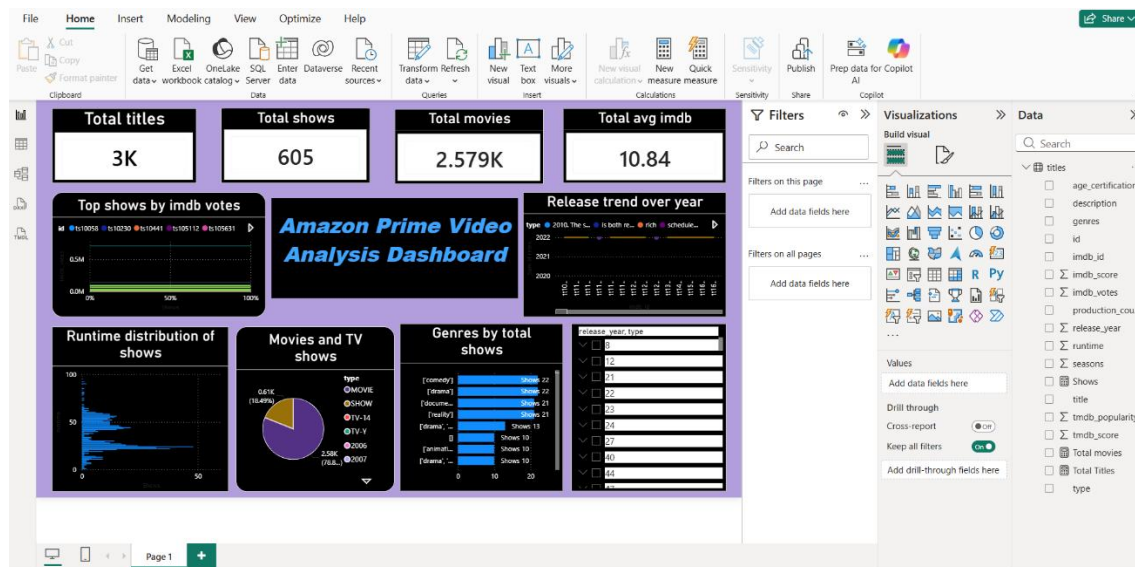

Figure1: Amazon Prime Video Dashboard Overview

Key Insights

- Most content on Amazon Prime Video consists of movies compared to TV shows.
- Drama and Comedy are the most popular genres.
- Content production increased significantly after 2015.
- IMDb ratings indicate moderate audience satisfaction.
- TV shows, although fewer, tend to have higher engagement.

Business Impact

The insights derived from this dashboard help in understanding viewer preferences, identifying popular genres and tracking content trends.

This can assist decision-makers in optimizing content production, improving recommendations and enhancing user engagement on the platform.
